

FASTENER DIMENSIONS

Reaching New Dimensions in Fastener Technology

OUR CUSTOMER SERVICES ARE DESIGNED TO HELP YOU GAIN A COMPETITIVE EDGE.

Fastener Dimensions is much more than your average manufacturer/distributor.

Custom Kitting • Short Run Manufacturing • Expedited Orders • VMI Programs • Blanks Program • Technical Support

Blank Bolts Program

Bolts delivered in only the quantities that you need, while reducing your expenses.

FDI's Blanks Program is designed to improve delivery times while providing you with added savings. When you make a commitment for future orders of a specific part, we'll prepare lots that can be premanufactured, tested, and certified to spec at any point of the manufacturing process. We'll hold the excess partially finished pieces at our location until you are ready to reorder. When it is time for your next order they will be finished to your spec in smaller lots, as they are needed. Eliminate ever having to manage and store left-over inventory because you are required to place a minimum order that exceeds your immediate assembly needs.

FDI keeps your premanufactured parts on hand. As soon as we hear from you, we can pick up and complete your parts and fulfill your order without missing a beat.

The head start that you gain by premanufacturing with FDI's Blanks Program significantly cuts fulfillment time and can help to reduce the need for rushed orders.

Take advantage of production-wise manufacturing and enjoy the benefit of additional savings.

Pennsauken, New Jersey 08110

Fastener Dimensions offers a full range of customized services designed to give you the extra edge that is needed to help you operate in the most cost effective way possible.

Highly Adaptable VMI Program

Our VMI uses the proven TwinBin® system, that works by storing reserve stock above active stock. Once the active stock has been depleted, pull the slider to release the reserve batch readying the upper chamber for new stock.

TwinBin rack systems are available in two sizes.

Bins come in three different sizes.

- Reduces stock outs
- First-In-First-Out (FIFO) rotation
- Provides traceability of parts
- Storing any size part
- Quick identification to re-stock
- Reducing cross contamination
- Fully modular – Easy to change and adapt to workflow changes
- Quick and easy to install
- RFID option available

TwinBin and FlagBin units with TiltBin dispensers.

When the slider is pulled, a Flag will pop up displaying red, so the store manager can quickly identify the parts that need to be re-ordered. The flag can be set to yellow so everyone knows the 3rd batch is on the way after the bin has been scanned. The Flag Devices can also be made RFID compatible to make your site even more efficient.

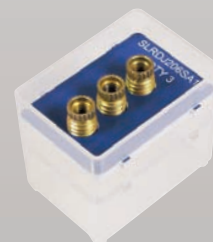

BinFlags and SpinFlags can be fixed onto any type of bin.

Kitting Solutions

If assemblies represent an important part of your business ...

FDI's Avi-Kits® will cut your labor costs and improve production.

Our kits have the exact hardware that you need for the job precisely when you need it.

Modules can be arranged in the order of assembly.

Improve Production Rates and Reduce Waste

- Sequence kitting available for Avi-Kits. The items you need, in the order of assembly.
- Building stage kitting available. Kits for each stage of your assembly can be custom built to order.
- Shop floor applications done prior to delivery. We can apply dry lube, Loctite®, paint, or primer to specific parts inside the kit. Eliminates the need of buying, storing and applying these items on the shop floor.
- Customer-managed inventory services available.
 - Your components can be added to kits ie brackets, small machines parts, assemblies and more.
- Kit materials, cardboard, plastic, foam, styrofoam, metal, wood, etc. Custom built crates, boxes, pallets built on site.
- Reduce ordering time and consolidate the fulfilment process. Ordering kits is easier with one line item blanket PO's with releases to fulfil your entire contract.
- Streamline your production and guarantee delivery to your customer.

Ask about Expedited orders. We specialize in Short Run Manufacturing. Call us for Tech Support.
